

Splunk to AWS Elasticsearch Migration – Assessment

FREE* | 5 Days

Learn how to migrate your Splunk workload to Elasticsearch, with no business disruption. Our practical migration approach tailored to your use case, detailed plan and cost estimates help simplify and accelerate migration, while setting you up to take full advantage of the AWS Elasticsearch.

What is in it for you

- Current system report
- Future state architecture in AWS & system design
- Report on cost savings from migration (license, infra, data)
- High-level migration approach, plan, cost, risks and mitigation

Key Activities

- Understand customer use case, business requirements, pain points and desired future state
- Decode current environment and analyze inventory (component systems, data models, dashboard, reports, response times, SLA, uptime, capacity)
- Recommend migration architecture, design and deployment topology, gaps, and risks
- Devise migration approach, multi-phase plan, costs, and project risks
- Define migration success criterion

What we need from you

- Identify one high impact Splunk use case in observability - ITOps / DevOps / Tracing
- Availability of client SPOCs (App/ DB/ Infra) for workshops/discussions
- System access (PEM, PPK files, IAM)
- Access to relevant artefacts (HLD/ LLD)
- 1 day turn-around for all SquareShift queries & questionnaires

Customer References

- Elasticsearch based Data Lake for U.S-based Unicorn EdTech SaaS Start-up
- A Hong Kong based Digital Bank uses ELK stack for end-to-end observability
- Real-time event analytics and user engagement metrics for a large Event Management firm using Splunk

Why SquareShift

Strong Tech & Engineering pedigree – Founded by Ex-CTOs of Unicorn Startups, strong Product and Engineering acumen run deep across the org and is part of SquareShift's DNA

Expertise in both Splunk & Elasticsearch – Successful migrations warrant expertise on both source and target systems. Our SMEs have expertise on both Splunk & Elasticsearch

Proven track record – Helped Enterprises and Startups alike to maximize value of their investments on Splunk/ELK across all key use cases (Search, Observability, Security)

Strong partner networks – SquareShift can seamlessly deliver value added capabilities (both upstream and downstream of ELK), through strong partner network

Other Offerings

- Elasticsearch Observability – POC (30 days)
- Splunk to Elasticsearch Migration – POC (45 days)
